SISMA S.p.A.

High precision laser systems, chain making machines and additive manufacturing.

SISMA is a worldwide reference in the design and production of extremely high precision machinery and laser systems. Headquartered in Italy, SISMA can count on a worldwide network and subsidiaries in Mexico, Spain, Turkey and USA.

Established in 1961, SISMA can boast an extensive experience with more than 150 models of automatic chain making machines. Today at the forefront in the development of laser solutions, SISMA has been able to extend its know-how to marking, welding, cutting, engraving and additive manufacturing.

Innovative by vocation, SISMA combines an independent and state of the art center of excellence for design and engineering with a highly efficient production facility to ensure always the highest product quality and a prompt response to market changes.
